

Rendalen 13.02.2019

Prosess of prepared moss-Cladonia stellaris:

-The moss is completely dried out before preparation.

-The preparation is based on different salt and latex. The product are conserved for everlasting and not living.

It will not reproduce or multiply in any way.

-The product are made for indoor decoration and will stay soft forever.

If humidity is less than 40, the moss will dry out and feel stiff.

Anyhow, when humidity rises, it will return soft again.

-After dying prosess the product are heated up to 85 degrees and stays in a heated clima cell (45°C)for approximate 18 hours.

-There is no toxic or any risk by using our product.
